Project Name Project - SIGNS WITH SMART CONNECTIVITY FOR BETTER ROAD SAFE

Temperature

Humidity

Node-RED interface showing a flow named "testing\_flow". The flow contains two nodes: "my\_inject\_node" and "Output\_node". The "my\_inject\_node" is connected to the "Output\_node". The interface includes a sidebar with node categories (common, function) and a right-hand panel for configuration. The browser address bar shows the URL: node-red-uzhqs-2022-10-08.au-syd.mybluemix.net/red/#flow/4a7855400c60c63e. The taskbar at the bottom shows the Windows operating system and various open applications.

Node-RED interface showing the "Edit debug node" dialog box. The dialog box is open for the "Output\_node" and displays the following properties:

- Output: msg.payload
- To: ☒ debug window, ☐ system console, ☐ node status (32 characters)
- Name: Output\_node

The "Enabled" checkbox is checked. The background shows the "testing\_flow" with the "my\_inject\_node" and "complete: 1" node. The browser address bar and Windows taskbar are also visible.
